

... a passion for Computing

"In today's highly competitive world, speed is of the essence. We take pride in delivering cost-effective high-speed solutions for some of the world's most complex computing tasks!"

Christian and François Dallmann

Most Demandig Applications

DALCO delivers high-performance computing solutions for demanding business or scientific project:

Tailored Technology Solutions

Every customer is unique - with unique computing requirements.

DALCO's IT solutions are tailored exactly to the needs of each client.

Systems and Services

DALCO's product and service portfolio covers a wide spectrum of IT requirements, from custom-configured servers and high-performance workstations, extensive SAN and NAS storage solutions all the way to high-availability, fault-tolerant systems, including software and after-sales support.

Supercomputers

DALCO is one of the pioneers in the field of Supercomputers based on cluster architecture. Using its highly specialized in-house know-how of combining large numbers of individual processors into Linux clusters has enabled DALCO to achieve breakthrough solutions for some of today's most demanding computing tasks: in science, industry and finance - all the way to the high-speed world of Formula 1.

... a passion for Computing

DALCO AG, Switzerland

In its nearly seven-year history DALCO has experienced dynamic growth, having evolved from a young start-up company to being one of the leading providers of high-performance computing solutions in Switzerland and one of the world's leaders with its "Swiss-made" Supercomputers.

DALCO has successfully established a unique business model of strategic partnerships with the world's leading technology suppliers, yet enjoying complete vendor as well as financial independence. This enables DALCO to select and globally source components and equipment optimally suited to the needs of any client or project - with a clear focus on quality, reliability and cost effectiveness.

Drawing on extensive in-house IT as well as mechanical engineering know-how, broad knowledge of scientific applications and in-depth understanding of business processes, combined with strong analytical skills, DALCO's team creates value and helps you achieve sustainable success by **making IT work for you!**

... making IT work for you

Our vision

DALCO's vision is to provide the best custom-tailored technology enabling the world's leading scientists and most creative brains to research and better understand nature's phenomena, achieving new breakthroughs leading to the development of novel solutions and innovative products in any field of science - to improve the quality of life of people around the world and to enrich our daily lives.

Our values

DALCO subscribes to a clearly defined set of corporate values, being firmly committed to the highest standards of ethical behavior, embracing diversity and equality in all of its policies and practices, concern for the environment, and good corporate citizenship.

Operational Excellence

DALCO's commitment to Operational Excellence is particularly focused on:

Customer Satisfaction and Quality

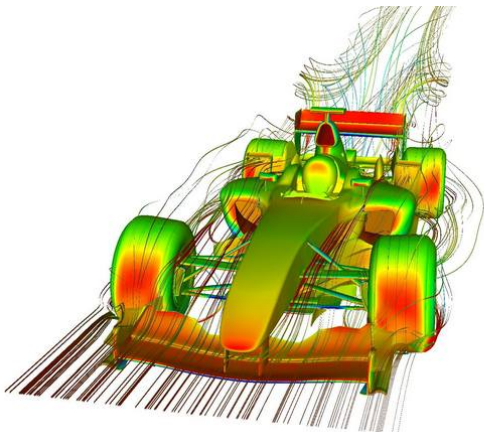

By providing top quality products and services on time, at competitive prices. DALCO continuously measures customer satisfaction, using internal operational metrics, external benchmarking and customer feedback.

Technology Leadership and Continuous Improvement

By maintaining our leading edge with innovative solutions, enabling our customers to be more competitive and successful in their own business activities. DALCO's definition of technology leadership encompasses first-class manufacturing capabilities, adaptive process management and control, a learning organization with highly motivated employees, and a commitment to Continuous Improvement in any facet of its business.

Mutually Rewarding Partnerships

By being a valued and trusted partner to customers and supply partners alike. DALCO takes pride in its reputation of listening carefully, acting responsibly and keeping its promises.

... making IT work for you

DALCO - Christian und François Dallmann

- A Swiss Success Story

There may be other computer "whizz kids" in the world, but few who have been able to combine a genuine passion for computing put in their cradle with the sense of purpose needed to start, sustain and successfully grow a business in one of the world's fastest-moving and most fiercely competitive fields. But these are exactly the ingredients possessed by Christian and François Dallmann, the founders and owners of DALCO.

Having literally turned a "garage business" (unlike the famous example of one of the world's IT leaders, the DALCO version was a rented barn) into Switzerland's number one supplier of High-Performance solutions and pioneer of supercomputers ranking among the world's top performers, the Dallmann brothers have since won high acclaim in the international IT community - and the respect of the world's "computing giants"

Not being enticed by the lure of making "quick and easy money" that burst the bubble of a lot of promising start-ups after the era of 'Internet and E-commerce hype, have been pursuing their charted course with Swiss clockwork precision: carefully analyzing each client's needs, carefully developing the perfect solution, carefully following each project through to completion, and carefully following up after its implementation.

Care for customers has been the basic formula for DALCO's success story, delivering DALCO's promise of "making IT work for you" from Switzerland to customers around the world.
